

DURA-CON TC

Dura-Con TC has been developed for all interior and exterior flatwork applications.

Dura-Con TC is a revolutionary concrete mix which ensures uniform hardness and wear resistance throughout the full depth of the slab - not just the surface

Flexibility

- Compatible with air-entrained, and non-air-entrained mixes
- Available in all mix designs
- Compatible with all admixtures and sealers
- Specifically designed for wear resistance

Durability

- Increased abrasion, wear and impact resistance
- Eliminates hardener delamination
- Plant batching ensures quality control

Finishability

- Compatible with all placing and finishing applications
- Reduced labour costs
- Less trowelling = increased flatness
- Plasticized workable slumps reduce placing labour

Economical

- Cost savings by eliminating the need to manually apply surface hardeners

Environmentally Friendly

- Improved working environments due to elimination of dust
